www.Kama-Labs.com

(Assembly instructions and latest firmware you can find on my website)

YANA

Assembled my own hands ☺

Thanks for purchase!!!

Features:

* 6 **IN-16** Russian NIXIE tubes (made in 1970-80)
* 2 IN-3 NIXIE separators (show am/pm and on/off of alarm)
* 32bit STM32F100C8 processor
* 15 parameters
* 12/24 hours mode
* 1 Alarm
* Turn off at night (increase lifetime of tubes in twice!)
* Turn off leading zero
* Smooth PCB routing
* Countdown timer 99days:23hour:59mins:59sec
* Full remote control
* Anti-cathode poisoning system
* USB connection to PC (for update firmware)
* Double Multicolour led glow (independent random color leds and **RGB** leds under each tube)
* Adjustable brightness of **RGB** and AUTO leds
* **RGB** led (6 colors of backlight or autochange color mode)
* Adjustable high-voltage block. 150-190 volts.
* 10 modes of switch digits
* 2 modes of separator tubes
* **IN-16** tubes works in static mode
* 6 Russian chips K155ID1 in sockets

* Thermometer
* Correction of temperature
* Accurate to +/- 1 minute/year
* Setup of clock accuracy
* Date in format DD.MM.YY or MM.DD.YY
* Backup battery. Data is not lost when power off
* 3 button - Time, Alarm, Color.
* Power source - DC 12V barrel plug 5.5mm/2.1mm ("+" inside, "-" outside)
* Consuming current - no more 500mA
* Height of pcb with elements only 13 mm
* Noiseless work

Dimensions of the clock - 161mm x 58mm x 66mm.

Dimensions of the clock in plastic case - 171mm x 68mm x 90mm.

DANGER! HIGH VOLTAGE! (~165 volts)

№	Parameter	Value
1	12/24 time format	0 - 12h time format 1 - 24h time format
2	Hi.Hour tube fading	0 - disable fading 1 - enable
3	Show time mode	0 - hard mode 1 - soft mode №1 2 - soft mode №2 3 - random mode №1 4 - random mode №2 5 - slot machine 6 - wave 7 - fade one by one 8 - shift 9 - run 10 - all effects one by one
4	Backlight mode	0 - all leds off 1..5 - brightness 6 - AUTO brightness 7 - AUTO brightness + turn off at night 8 - turn off at night
5	Show current temperature	0 - disable 1 - every 2 minutes 2 - every 5 minutes

Button function:

Short click = ~0.5 sec. Long click = ~1 sec

First button - Time: Short click - on/off alarm (indicates by KM separators tubes) Long click - time setup

Second button - Alarm: Short click - parameters mode
Long click - alarm setup

Third button - Color: Short click - change color of backlight or disable leds Long click - date setup

If you will press and hold one button and then will press second:
1 + 2 = show current temperature
1 + 3 = show current date
2 + 3 = test mode for checking nixie tubes
3 + 1 = show countdown timer

How to set time?

1) Press and hold 1 button ~1 sec
2) Hours tubes start to blink
3) Press 1 button for increment value and 2 button for decrement value
4) Press 3 button for go to next value
6) Seconds will reset to "00" if you will press 1 or 2 button
7) Press 3 button for exit from setting time mode

How to set alarm?

Similarly. However, use 2 button for enter into setting mode (press and hold ~1 sec).

How to change parameters?

1) Press 2 button for enter into parameters mode
2) You will see number of parameter (1) and value of parameter (0): 1_ : _ _ : _ 0

3) Press 1 button for increment value and 2 button for decrement value

4) Press 3 button for go to next parameter

How to set current date?

1) Press and hold 3 button for 1 sec

2) You will see date in DD.MM.YY format

3) Press 1 button for increment value and 2 button for decrement value of days in month

4) Press 3 button again for set the month and year

How to change color of backlight?

Press 3 button to change color or to set autochange color.

How to set countdown timer?

Press 3 + 1 for show countdown timer. Here buttons have next function:

1 - Short click – on/off timer
Long click – exit

2 - Short click – DD:HH:MM or HH:MM:SS time format
Long click – timer setup

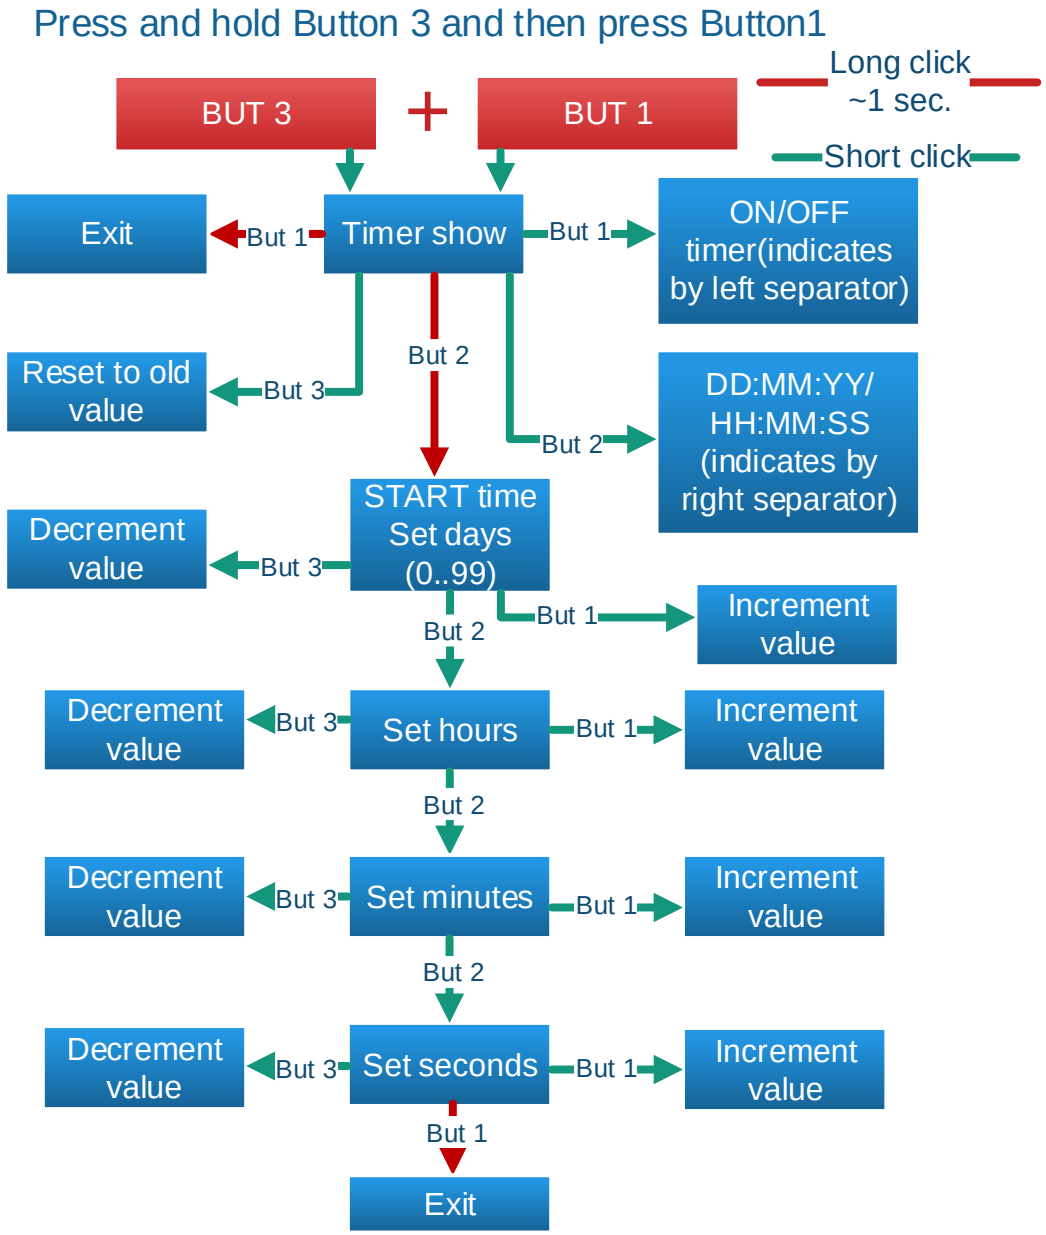
3 - Short click – reset to previous timer value

In timer mode first separator show DD:HH:MM / HH:MM:SS time format, second separator show on/off alarm.

For set countdown timer push 2 button for 1 sec. You will enter in timer setup mode and you will see:

Days : Hours : Months
00 : 00 : 00

Use 1 button for increase value and 3 button for decrease value. Push 2 button for change position. For set seconds you will see next format: _ _:SS:_ _
1 _ :00: _ 1



Remote control in timer mode

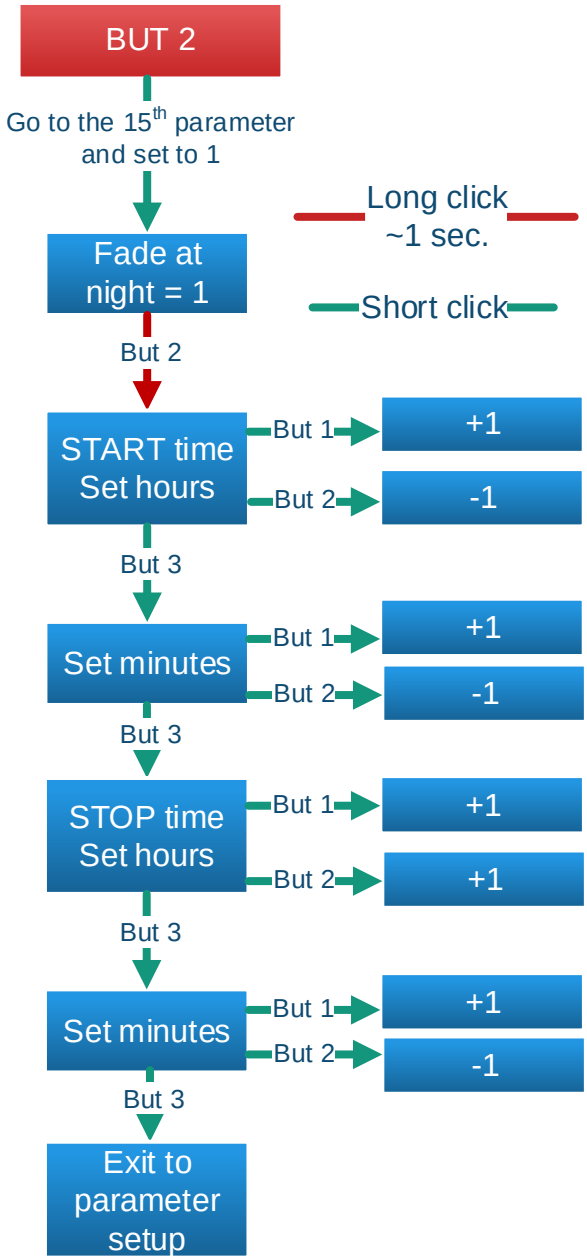
Button	Action
OK	On/off timer
▶	DD:HH:MM / HH:MM:SS
◀	Reset to previous timer value
1	Timer setup
7	Exit

How to make HARD RESET if something wrong?

When your clock starts, you hear short melody. If you will press 1 button for 1-2 second in this moment, clock will reset all your setting.

You will hear p-i-i-i-i-i-i-p p-i-p p-i-p. That's mean HARD RESET is done.

How to set night fading?



Set 15th parameter to 1 and press 2 button for ~1sec and you will enter into setup. You will hear b-i-i-i-p and will see:

00 : __ : __

Now, you need set time of START fading. Use 1 and 2 button for increase/decrease value and 3 button for change digit. After that, you need to set time of STOP fading similarly.

Example: you go to sleep at 11:10PM and get up 6:30AM. So, you need to set START time as 23:10 and STOP time as 6:30.

How to use remote control?

Button	Action
OK	Enter/exit in parameters mode
◀ ▶	Next effect of switch time
▲ ▼	Change value
1	Time setup
2	Alarm setup
3	Date setup
4	Show temperature
5	Show date

6	On/off alarm
7	Countdown timer setup
8	Turn off LEDs and tubes
9	Brightness of bottom LEDs
*****	Change brightness of top LEDs
#	Change color of top LEDs

- Use ◀ ▶ for change position in setup modes
- For change value you can use ▲ ▼ or use any number buttons
